Collaborating with clients to understand their design needs and preferences and incorporating feedback to refine designs.

Staying up to date with latest trends in web development and implementing them in

Summer Internship

Jul 2022

CIPHERS SCHOOLS

During my summer internship at Cipher School, I had the opportunity to work extensively with React JS for web development. React JS is a widely used JavaScript library for building user interfaces, and it was an invaluable experience to gain hands-on expertise in this technology. Working with React JS at Cipher School taught me the importance of collaboration, problem-solving, and effective communication within a development team. I gained practical experience in agile development methodologies and became proficient in using version control systems like Git.
