## Work Experience:

### Associate Research Analyst – Vaco Binary Semantics

Full-Time

Gurgaon, Haryana

November 2024 – Present

- Contributed to Google's Gemini model by leading research and product analysis, evaluating 200+ AI responses during Alpha testing, creating data visualizations for strategic teams, and conducting global market research. Currently collaborating with Google AI to troubleshoot model issues, support product development, and provide feedback to engineering teams, ensuring continuous improvement and smooth operation of AI-powered products.

### Associate Analyst – Global Logic

Full-Time

Gurgaon, Haryana

September 2023 – January 2024

- Conducted a comprehensive analysis of AI-generated e-commerce apparel recommendations for Google, resulting in a 20% reduction in customer returns and a 10% increase in average order value. Precise quality analysis, daily task management, and active participation in team discussions.

### Associate Software Developer - Venturepact

Full-Time

Jalandhar, Punjab

January 2023 – June 2023

- Developed and launched web applications using Front-End technologies. Orchestrated seamless collaboration with cross functional teams for high-quality web applications. Staying up to date with the latest trends and technologies in web development and implementing them in your work to improve the quality of your web applications. Engineered and deployed cutting-edge Front-End technologies tailored to company and user specifications.

## Projects

- Scout Verse Co.** [Scout Verse Co. \(scout-verse.vercel.app\)](#) Clothing rental platform with Men's and Women's categories, dynamic landing page, sign-in/sign-up, and API integration for garment data and pricing.  
Login: pranshu002y@gmail.com Password: 123@15
- Instagram Clone:** <https://drive.google.com/file/d/1jxKWE2x0eYdaM9xZYdE743QGTMDge-gZ/view?usp=sharing> Cloning of the Instagram with new animations and motions. It includes login and logout just like the same Instagram. It has story add section and view section with all the functionalities. Comprises of dark and light mode.

**User Suggestions** [NEMESIS \(nemesis-flame.vercel.app\)](#): The project focuses on users sharing their interests in movies, garments, and games. It fetches user data through APIs and is optimized for responsiveness on both mobile phones and tablets. This ensures an intuitive user experience across different devices, making it easy for users to connect and share their preferences with others who have similar interests. Login: click on login with google

- Learning Management System** [LMS \(lms-1.netlify.app\)](#): SaaS designed for universities and schools, facilitating data management for employers and students. Enables task assignments to students, department allocation to teachers via Admin panel. Utilized React components, replicated Figma design into HTML, and conducted backend data binding, API testing, and GitLab project management.
