PROFESSIONAL SUMMARY

Frontend Developer and UX Research Analyst with 1.5+ years of experience designing and implementing user interface components using React ecosystem. Skilled in optimizing front-end performance, creating reusable React modules, and working with responsive web applications and conducting end-to-end user research. Proven expertise in debugging, profiling, and delivering production-quality JavaScript code within Agile environments.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Custom Hooks, React Router, Bootstrap, Tailwind CSS, Material UI, Sass, Responsive Design

Backend: Node.js, Express.js, SQL

Tools & Debugging: Chrome DevTools, React DevTools, ESLint, Git, GitHub, Jira, Asana

Development Practices: Performance Optimization, Code Reusability, System Monitoring, Software Design Patterns, Agile/Scrum

WORK EXPERIENCE

Associate Research Analyst – Highspring India LLP (Gurgaon, Haryana) | Nov 2024 – Mar 2026

- Designed and implemented UI components supporting Google Gemini model initiative; created reusable React component library for product journeys (discovery to engagement), maximizing code reusability across 15+ components
- Applied qualitative and quantitative research methods — usability testing, interviews, and surveys — to identify user pain points and growth opportunities.
- Collaborated with engineering teams to ensure high-quality implementation of design systems, maintained ESLint-compliant code standards, conducted usability testing and data analytics to refine UX interactions; translated research insights into frontend optimizations improving user engagement metrics

Associate Software Developer – Venturepact (Jalandhar, Punjab) | Jan 2023 – Jun 2023

- Designed and deployed responsive React.js applications with HTML5, CSS3, and ES6+ JavaScript; implemented 12+ production-ready components with maximum code reusability
- Optimized front-end performance by identifying and eliminating performance bottlenecks; integrated lazy loading and code-splitting reducing bundle size, Integrated REST APIs with error handling and request validation.
- Collaborated with backend and QA teams to resolve 15+ integration issues and deliver features on schedule
- Maintained well-documented, readable JavaScript code following ESLint standards; ensured all custom hooks and utility functions included comprehensive JSDoc documentation

PROJECTS

Portfolio with OpenRouter API Integration ([Pranshu Yadav](#)) – Full-stack application using Express.js, React.js, Node.js with responsive UI and RESTful APIs; integrated OpenRouter API with secure error handling and deployed on cloud platforms

Scout Verse Co. ([Scout Verse Co.](#)) – Clothing rental platform featuring responsive design, dynamic landing page, sign-in/sign-up authentication, and API integration for product data management

User Suggestions NEMESIS ([NEMESIS](#)) – Interest-sharing platform optimized for mobile and tablet responsiveness using React components and REST API integration

Learning Management System ([LMS](#)) – SaaS platform for universities built with React components, Figma-to-HTML design implementation, backend data binding, and API testing (**Login: 20222 Password: 2002**)

EDUCATION

Bachelor of Technology – Computer Science & Engineering | Lovely Professional University, Jalandhar, Punjab | 2019–2023

Class XII – Science | R.L.B. School, Lucknow, Uttar Pradesh | 2018

Class X – Science | R.L.B. School, Lucknow, Uttar Pradesh | 2016
